### **PSC APPROVES ELECTRIC TERRITORIAL AGREEMENT**

JEFFERSON CITY—The Missouri Public Service Commission has approved an electric territorial agreement between Ozark Electric Cooperative and City Utilities of Springfield, Missouri which designates the provider of electric service to serve a sewage pump station that is to be built inside the Springfield city limits.

Under the territorial agreement, Ozark Electric Cooperative will provide electric service to the sewage pump station located along Farm Road 103. The territorial agreement will not require the transfer of facilities or customers between the cooperative and the city.

“The Commission finds that the territorial agreement will allow the City and the Cooperative to avoid wasteful duplication of electric services within the affected service area,” the Commission’s order said. “The territorial agreement will also allow the most efficient use of current facilities and save the City taxpayers more than \$200,000. The Commission finds that the territorial agreement is in the public interest.”
